SUMMARY	I am a fresh graduate who has an interest in back-end developers. Skilled in building web based application and know the technique about identifying database, fundamental programming, version control system, and API management along with API documentation and API testing. Have experience in building website with Node.js, Express and a bit of TypeScript	
EXPERIENCE	Suitmedia Digital Agency <i>Software Engineer Intern</i>	Palembang, ID <i>Online</i> Aug 2022 – Dec 2022
	<ul style="list-style-type: none">This is an internship program from Suitmedia that I got from Kampus Merdeka program. I got this program on the third batch and I choose Software Engineer intern for 5 months from August 2022 to December 2022The internship program is conducted on a project basis using real projects. On the project I handled bug fixes, modified existing small features, and created new small to medium scale features. In addition, the project implemented daily scrum which made the progress of the project easy to monitor.	
	Binar Academy <i>JavaScript Backend Independent Study</i>	Palembang, ID <i>Online</i> Feb 2022 – Jul 2022
	<ul style="list-style-type: none">This is an independent study from <i>Binar Academy</i> that I got from Kampus Merdeka program. I got this program on the second batch and I choose JavaScript Backend to study for 5 months from February 2022 to July 2022This program teach us from the basic of Backend Development, Node.js, Rest API, MVC Architecture, documentation, tesing, deployment, and CI/CD. From this program, I got 8 challenge to practice and improve my programming skill. All of the callenge can be seen on my GitLab, then I also got a team project for final project that consist of front-end part and back-end part.My final project can be seen on my secondhand-be repository
